

a charity dedicated to improving lives affected by eosinophilic disorders

Feeding Tube Awareness Week 2021 Promotions Kit

This kit contains information to help you raise awareness for Feeding Tube Awareness Week (7-13 February 2021) through your social media channels and newsletters. These resources can be downloaded from our FTAW website: <https://www.feedingtubeaware.com.au/raiseawareness/awarenessresources/>

FTAW is about bringing everyone together who has a feeding tube, whatever the reason may be.

Please look out for our social media posts and stories we are sharing leading up to and during Feeding Tube Awareness Week and like and share them to raise awareness:

Facebook: <https://www.facebook.com/ausEEInc>

Twitter: <https://twitter.com/auseeorg>

Instagram: https://www.instagram.com/ausee_inc/

LinkedIn: <https://www.linkedin.com/company/ausee-inc/>

Thanks for your help to increase awareness and understanding to the greater community about tube feeding and raise some of the challenges faced and highlight the day-to-day impact on individuals, carers and families.

FTAW 2021 PROMOTIONS KIT

FTAW SOCIAL MEDIA BADGE / WEBSITE BANNER

Please help us promote Feeding Tube Awareness Week by sharing one of these FTAW images on your social media pages or website.

Suggested posts:

Feeding Tube Awareness Week (7–13 February 2021) is about bringing everyone together who has a feeding tube, whatever the reason may be. We've partnered with ausEE to help raise awareness for those living with feeding tubes and the day to day challenges they face. To find out more visit: www.feedingtubeaware.com.au #FTAW2021

Know someone living with a feeding tube? We're helping raise awareness for those living with feeding tubes this Feeding Tube Awareness Week (7-13 February 2021). Visit www.feedingtubeaware.com.au to get involved. #FTAW2021

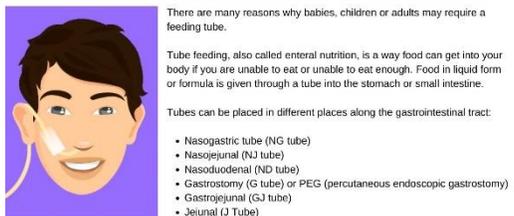

FTAW POSTER

Share in your newsletter or print and place our Feeding Tube Awareness Week poster around to help raise awareness.

Suggested wording:

There are many reasons why babies, children and adults may require a feeding tube.

Tube feeding, also called enteral nutrition, is a way food can get into your body if you are unable to eat or unable to eat enough. Food in liquid form or formula is given through a tube into the stomach or small intestine.

You can find out more about tube feeding this Feeding Tube Awareness Week (7-13 February 2021) here:

www.feedingtubeaware.com.au #FTAW2021
